FLOKIZAP VIKING PAPER

MEET FLOKIZAP

A heroic Viking from the future. A future in which society is oppressed by ruthless tax rules. With his godlike powers he is in a constant battle against these taxes and those who control them. His sole purpose is to destroy tax and distribute wealth among his believers.

FlokiZap $FLOKIZ is a brand new reflection protocol on the Binance Smart Chain.

This contract will have unique features and will be the first of its kind to introduce reflections to holders with absolutely ZERO taxes and being deflationary.

FlokiZap_VikingPaper_v1

CURIOUS HOW 0% TAX WORKS?

Flokizap is based on a token with passive yield mechanics that do not stem from transfer taxes. Instead, the passive yields come from supply expansion from new buy orders (which represent organic demand for the token). As a Flokizap holder, you passively earn more tokens for every new buy order placed for $FLOKIZ. Your rewards are instantly "zapped" into your wallet after each new buy. There is never any tax when buying or transferring between wallets.

WHY IS 0% TAX BETTER?

01

Tokens with transfer taxes discourage trading activity and especially alienate users who trade with size (no one likes paying extra fees, on top of existing gas fees).

02

The effective yields holders receive are negligible unless there is massive trading volume.

FlokiZap_VikingPaper_v1

WON'T THIS PROTOCOL BE INFLATIONARY?

No! Introducing the FlokiZap Community Torch

The contract will have a unique triggerable community torch. This burn function can be called by anyone from the community. Once a community member lights the torch, the contract automatically burns 1% (% is flexible & can be adjusted accordingly to the chart) of the total liquidity pool. The member that calls this function will be rewarded 1% of the amount that is burnt. The frequency of which this function can be called will be flexible and will change up on the conditions of the chart and the amount of the total supply.

Burning the supply of $FLOKIZ raises the price floor. Contrary to many mining or staking projects that burn tokens from what they hold outside liquidity, which has no impact on price, our project burns directly from liquidity which results in a raised price. We burn these coins by sending them out of existence; they are not sent to burn wallet of any kind.

FlokiZap_VikingPaper_v1

FLOKIZAP IS ABOUT GAINING ON BUYS…

The exact formula used to calculate the global expansion amount is:

Global expansion amount = Buy amount * 10%

For example:

1. Let's say the total supply is 10M and you hold 50,000 $FLOKIZ tokens. There are 5M tokens in LP, so effective total supply for calculation is actually 5M. You currently hold 1% of the effective total supply. (LP does not receive reflections, so those tokens are removed from total supply calculation).

2. The next buyer purchases 100,000 $FLOKIZ tokens.

3. This would lead to a global supply expansion of 10% of 100,000 $FLOKIZ or 10,000 $FLOKIZ, and you would receive an additional 100 $FLOKIZ (1% of 10,000). Your rewards are instantly "zapped" into your wallet after each new buy.

FlokiZap_VikingPaper_v1

... AND GAINING ON SELLS.

Every time the Community Burn is triggered, the total supply decreases. This benefits our holders through direct price increases and increased scarcity of the $FLOKIZ token.

FlokiZap_VikingPaper_v1

FLOKIZAP IS WAITING FOR YOU TO JOIN

There are a few mechanics in place to encourage a fair launch and prevent abuse:

1. Max transaction limit of 1% to start which applies to buys sells and wallet transfers. This will later be set to 2%.

2. 2 minute transfer cooldown** after each transaction. This means users cannot buy a large amount of tokens and instantly sell your yield ($FLOKIZ is flash loan resistant). This mechanism ensures that when paperhands decide to dump they cannot buy back for the next 2 minutes. The transfer cooldown will be set to 0 as soon as we are past the initial launch.

PRE-SALE
2 November – 17:00 UTC *

LAUNCH
2 November – 19:00 UTC *

In case of changes the new dates will be announced in the Telegram

** *The timer can be adjusted accordingly to the conditions of the chart*

WHAT IS AIRZAP?

Airzap is an airdrop platform & protocol where up-and-coming projects will be promoted to our community and potential investors.

By airdropping tokens to our followers it allows their user base to increase with diamond hand holders.

Making light work of token distribution

AIRZAP

WHY SHOULD PROJECTS BE EXCITED FOR AIRZAP?

- *Projects that use our Airzap service will get a massive promotional boost and therefore new investors.*

- *By using our platform new projects will gain legitimacy; vital for projects that have had no past experience in the Crypto space.*

- *Projects get to use our own Airzap Token Redistribution Protocol.*

WHY SHOULD THE COMMUNITY BE EXCITED FOR AIRZAP?

- *Only quality projects will be considered by the team. The team will complete their own audit process to determine whether a project is worthy of AirZap.*

- *Besides getting airdrops from up-and-coming tokens, our loyal $FLOKIZ holders will also benefit from privileges like whitelist spots and custom NFTs. Holders/members will also feel safer on our platform as we will make sure to only call out safe projects.*

- *The team will have funds in place to acquire tokens which the community feel is worthy of AirZap - these will undergo our own strenuous audit process in order to be considered for AirZap.*

PHASE 2

- Logo on Web3 Wallets and Pancake Swap
- Listing on CoinGecko
- Listing on CoinMarketCap
- Listing on BlockFolio
- 5000 Holders

PHASE 3

- Launch Airzap
- Expand Development team
- FlokiZap new Bridges, Matic, Ada and More
- Certik Audit
- 7000 Holders
- CEX listings: Hotbit, Whitebit Bitmart

VALHALLA

0% TAX
100% GAINS

FlokiZap_VikingPaper_v1

VIKINOMICS ARE FAIR AND CLEAR

Pie chart values: 59, 21, 3,5, 4,5, 2, 1,5, 1,5

Legend:
- PRESALE & LIQUIDITY
- MARKETING, RESEARCH & DEVELOPMENT
- PINKSALE FEES
- MOD WALLET
- AIRDROP $BZAP HOLDERS

- COMMUNITY CONTESTS

PRE-SALE

PinkSale, 150BNB soft cap / 300BNB hard cap

*70% locked for 6 months, 30% post-launch marketing*

Pre-sale price = Launch price

NAME	TICKER	SUPPLY	NETWORK
FLOKIZAP	$FLOKIZ	10M	BSC

REFLECTIONS & TAX

10% reflection on every buy order

0% tax on buys and sells

10,000,000 $FLOKIZ

5,900,000 (59%) will be allocated for presale and liquidity. 70% of the presale amount will go towards liquidity and 30% is used for post launch marketing and R&D. The liquidity will be locked on PinkSale for a period of 6 months.

2,100,000 (21%) will be allocated to airdrop previous $BZAP holders. The tokens will be vested and airdropped in 3 phases, 33% pre-launch, 33% after 4 days of the launch and the final 33% after 7 days of the launch.

1,000,000 (10%) will be allocated for marketing & Research and Development (R&D) prior to launch.

500,000 (5%) will be distributed to the initial investors and team members in exchange for seed funding and contribution.

200,000 (2%) will be allocated for PinkSale fees.

150,000 (1,5%) will be allocated for community contests.

150,000 (1,5%) will be allocated for the mod wallet.
